GM Chris,

Thank you for the call and information. We have relayed your information to Unified Command and are following up. Let's keep the lines of communication open. Let me know if you need anything.

David

Dear David,

Thank you for your call yesterday, I really appreciate the prompt reply and everything your agency is doing to help manage this incident. All my contact details are below. If there is anything we can do to help please just let me know.

I have copied Duane Campbell above. Duane is our Safety and Security Manager and he is also an industrial hygienist. We are more than happy to share all our IH data with you when the dust settles a bit. Duane is 100% occupied right now with protecting our people and our assets. Our guys were sheltered in place almost the entire night again due to high benzene and VOC's in our terminal and on our docks (from the material that spilled in the ship channel).

We feel it is imperative from a risk perspective that everything maintains a foam blanket until the product is safely removed. This is from both a fire and IH perspective as the foam traps the product and will reduce the vapors we are seeing.

Once again thanks for the support and feel free to call or email me day or night.

Best regards  
Chris
